

Exercise 3

Designing Accessibility into Apps

Open the artboard and the Accessibility Notation.ai file into Adobe XD (or your own design tool).

Create a new layer for the artboard. Define the tab order for the interface you evaluated.

Define the Groups you've identified, and in what order users should move between them.

Assign any keyboard shortcuts you've agreed to.

Document any other features you think are relevant to the design in a space next to the artboard.

Shortcuts

Tab Order

Letter Keys

Directional Arrows

Assistive Technology
